

WARNING

It is essential to your safety and the safety of SIDNE's users and bystanders that the following precautions be strictly complied with. FAILURE TO FOLLOW THESE PRECAUTIONS CAN LEAD TO SERIOUS INJURY OR DEATH.

1. Make sure you read, understand, and follow the instructions in the accompanying operation manual in their entirety. If you have any questions about the safe operation of SIDNE, please call 1.800.272.5023 before operating this vehicle.
2. Keep all arms, legs, and other body parts within the vehicle at all times while the vehicle is in motion.
3. Operators must use the seat belts that are provided, as well as an appropriate helmet and safety glasses or goggles.
4. MAKE SURE THAT THE AREA OF OPERATION AND THE APPROPRIATE SAFETY ZONE ARE FLAT AND FREE FROM ALL OBSTRUCTIONS! These areas must be large enough and free from radio interference to assure safe operation of SIDNE. For more details regarding the requirements for the area of operation and the Safety Buffer, please refer to the operators' manual at

page ____.

5. SIDNE is designed to simulate the driving experience while the operator is impaired. It is therefore essential that an unimpaired, trained monitor observe the operation of SIDNE from outside the vehicle and be prepared at all times to activate the emergency stop button that is located on the remote control device. For further instructions on the operation of the remote control device, please refer to the Owner Manual at page ____.
6. Keep all bystanders or other persons out of the area of operation and the Safety Zone at all times while SIDNE is in operation. It is important to have at least one person, other than the monitor/remote control operator, make sure that nothing enters the area of operation or the Safety Buffer while SIDNE is in operation.
7. Test all safety equipment including the brakes, remote control, and seat belts before operating SIDNE. See the operator's manual at page ____ for more details.
8. Do not alter the equipment or any of its settings or controls without the written approval of the manufacturer.
